

CE-Conformity Declaration for flooring/sport areas

European Standards for resilient, textile and laminate floor coverings (EN 14041) and wood flooring (EN 14342) were published in several versions. EN 14904 is the harmonized standard for sports areas.

As a notified body and services partner for CE marking, the Development and Testing Laboratory Wood Technology GmbH (EPH) is at your disposal. For the Declaration of Performance (DoP) – as pre-requisite for the CE marking of your products – we will determine the required or optional performance characteristics. If necessary (System 1), we will test the performance characteristics (initial type test), evaluate and certify the Factory Production Control (FPC) and conduct the regular external surveillance. We will connect contact partner in UK to use our CE test reports for UKCA-certification.

Properties according to EN 14041

- Obligatory declaration
 - Fire resistance according to EN 13501-1
 - Slippery resistance according to EN 13893
- Optional declaration on demand
 - Electrostatic behaviour according to EN 1815
 - Formaldehyde emission according to EN 717-1,2
 - PCP-content according to CEN TR 14823
 - Thermal resistance/thermal conductivity according to EN 12667 or EN 12524

Determination of the slippery resistance of a resilient flooring according to EN 13893

Properties according to EN 14342

- Obligatory declaration
 - Fire resistance according to EN 13501-1
 - Formaldehyde emission according to EN 717-1
 - PCP-content according to CEN TR 14823
- Optional declaration on demand
 - Bending strength according to EN 1533 (except for veneered flooring)
 - Slippery resistance according to CEN TS 15676
 - Thermal conductivity according to EN 12664 or EN 12524
 - Biological durability according to EN 350-2

Determination of the thermal conductivity

Determination of the formaldehyde emission
